FOLLOW UP... "AND YOUR NAME IS JONAH"

Here are a few "did you knows":

** Did you know that "Jonah" (Jeffrey Bravin) is the son of Gallaudet alumni, Judy and Philip Bravin, Class of 1966?

** Did you know that Bernard Bragg assisted with this program as a technical consultant and as Jeff's coach?

** That scriptwriter Mike Bortman visited Kendall Green about two years ago and spent quite a bit of time with Donna Chitwood meeting Gallaudet personnel collecting input and ideas?

** ..and that Mike knows sign language well enough to interpret for Bernard and Jeff during the filming?

** Feedback to this program has been very favorable...but as you know, not everyone will take kindly to this type of program. There is little doubt that CBS-TV will be swamped with letters of criticism. It is important that they know what you think. --Jack Gannon

NEWS FROM KDES

--Quintin Greenfield, KDES Middle School student, was one of several students selected to represent District of Columbia schools at the Washington, D.C., kick-off celebration of the International Year of the Child on January 26. Quintin, representing Kendall School and handicapped children throughout the city, talked before an overflow crowd at the District Office Building. The student stressed the importance of "understanding what deafness is all about" in his brief address, noting that the International Year of the Child seems like a "perfect time" to start sharing ideas and getting involved.

Other highlights of the ceremony included remarks by D.C. Mayor Marion Barry.

--Members of the KDES community attended a special meeting on January 29 to hear about what the inside of the new Kendall School will look like. The January 29 meeting was devoted to a presentation of the interior design of the new school by Friday Design, Inc.

ENERGY TIPS FROM JIM HULL (CONT.)

Here's how to save energy at home:

6. Keep the lint trap clean in clothes dryer. Operate the dryer with a full load.
7. If you have a fireplace, keep the chimney damper closed tightly when the fireplace is not in use.
8. Turn your thermostat down in the winter at night and up in the summer at night.
9. Never line your oven with foil as it interferes with proper heating.
10. Repair leaky faucets. A dripping faucet can waste 5000 gallons of water each year.
11. Keep shades and drapes closed during the day in rooms not being used during the summer. This will keep the sun's rays out.

ON THE GREEN is published each week by the Office of Alumni and Public Relations for the faculty and staff of Gallaudet College.
